UCSB Summer Internship in Psychological & Brain Sciences

June 17 - August 12, 2023 In Santa Barbara, CA

The Department of Psychological & Brain Sciences at UCSB is proud to partner with Morehouse College for an eight-week Summer Undergraduate Research Internship in beautiful Santa Barbara, CA

This 8-week program is designed for undergraduates from Morehouse College to gain hands on research in a lab in our department at UCSB. By working on research projects with faculty and graduate student mentors, interns will gain valuable exposure to and experience in a high impact social psychological, developmental, behavioral neuroscience, or cognitive neuroscience lab.

This program will take place from June 17th until August 12th. Interns will have the opportunity to work in either one lab for the whole duration of the program (8 weeks), or work in two different labs (4 weeks each).

Other program activities include a summer workshop on R programming, seminars on the graduate school application process and other skills, and networking and social events with UCSB faculty and graduate students.

Interns will receive a stipend of \$4,000 for the summer and are provided free housing on campus with a meal plan.
